

Origami Modular Star

origami-fun
www.origami-fun.com

You will need 6 small sheets of square paper to make this star.

1. Start with your paper coloured side up. Fold in half, then in half again, as shown. Crease well, then open out again.

2. Turn the paper over and fold in half diagonally and in both directions. Crease well and open out once again.

3. Holding the points shown, bring them both down to the centre point on the bottom line. Flatten model.

4. Fold bottom corners of top layer only to top point and unfold. Repeat on back. This is one module.

5. Make 5 more modules so you have 6 altogether.

6. To join modules, slip one set of "legs" into another set of legs, like so:

7. Push the legs in as far as they will go.

8. Pull the centre crease outwards, making it into a mountain fold.

9. Continue to add modules to build the star, repeating steps 6-8 as you go. Finished Modular Star.
